

4. REPORT STRUCTURES

The following structures provide starting points to be discussed and modified, and ultimately taken forward by Coordinating Lead Authors and their writing teams.

Scientific and Economic Foundations

- I. Introduction**
- II. Viewing ecological, economic and agricultural systems as a ‘complex’**
 - Human health and skills
 - Society
 - Economy
 - Environment (agrobiodiversity and agroecosystems)
- III. A comprehensive analysis of the agriculture and food value chain**
 - Production
 - Typology of production systems
 - Processing and distribution
 - Consumption
- IV. Visible and invisible flows: what are they and how can they be measured**
 - The concept of ‘value addition’
 - The TEEBAgriFood valuation framework
 - An overview of visible and invisible flows
 - System of National Accounts
 - Ecosystem services
 - Health
 - Pollution
 - Emissions
 - Social values
 - Risk and uncertainty
- V. Mainstreaming TEEBAgriFood into policy, business, farms and citizens**

Policies

The following categories have been identified as possible ways to organize and structure this report:

- By level of policymaking (international/national/local)
- By stage of value chain (production/processing/consumption)
- By type of policy intervention (regulatory/market-based/information-provisioning)
